

INFORMATION SHEET # A04

MINERAL SAND NEXT DOOR TO THE OUYEN INTERMODODAL

OUYEN INTERMODODAL

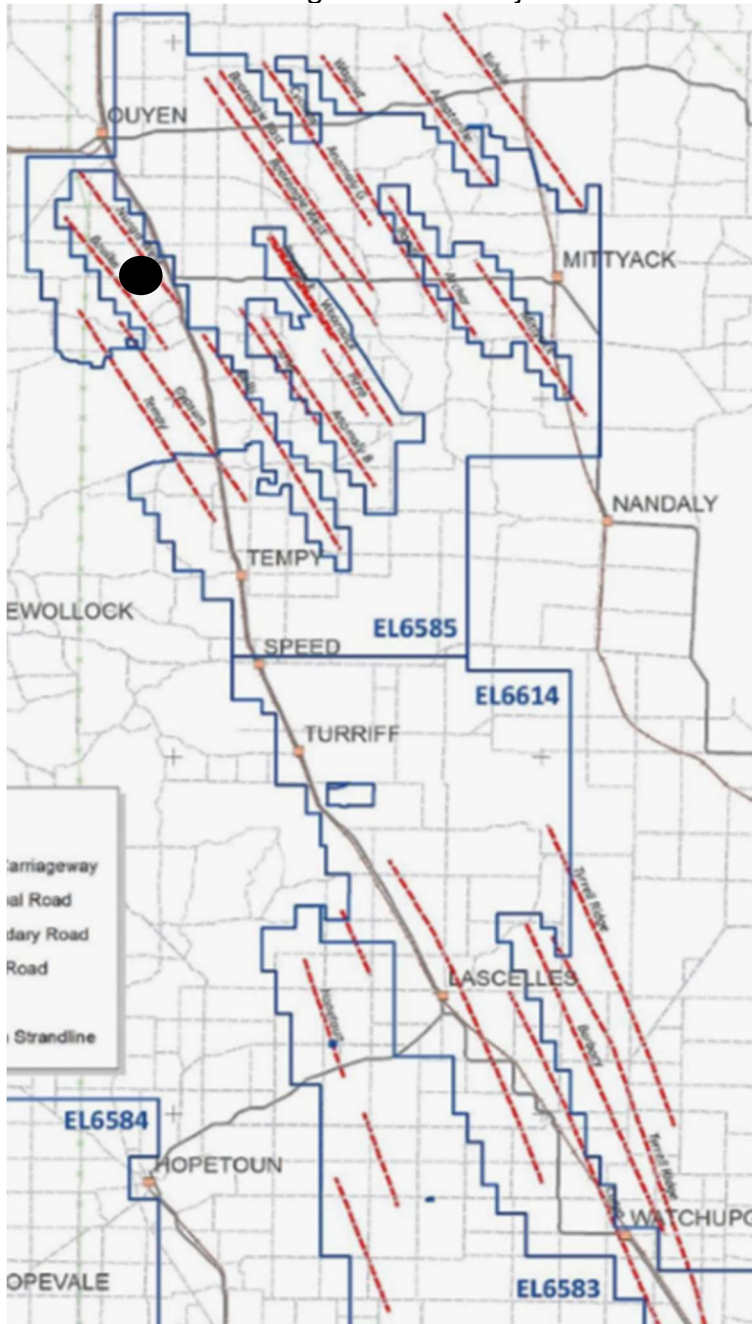

A community initiated project for the betterment of all in North West Victoria and beyond

Mineral sands deposit right next door to Ouyen Intermodal and numerous others in proximity

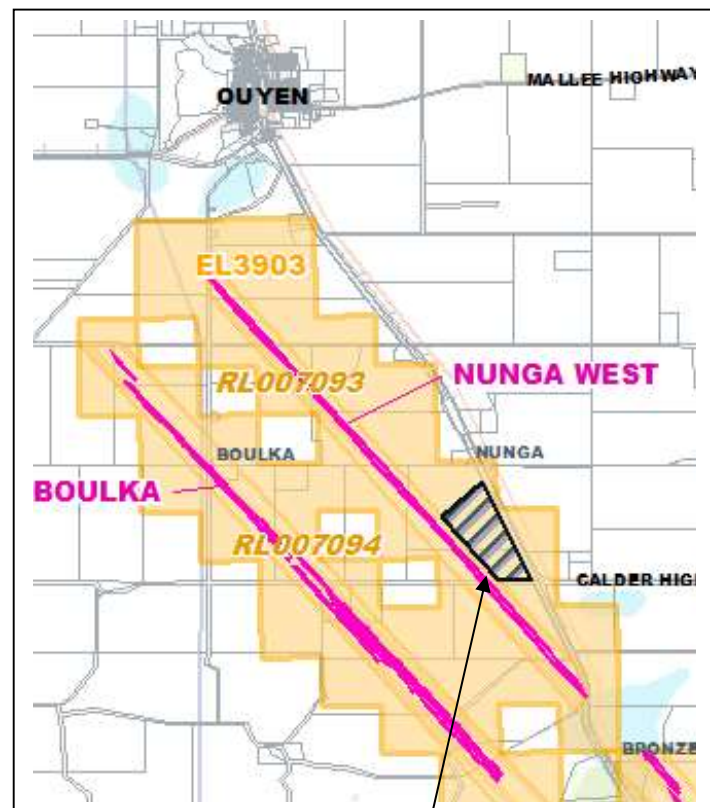

The following maps show the close proximity of the Ouyen Intermodal rail terminal to many untouched mineral sand and rare earth strands. Iluka Resources are looking for an alternative to their bulk train loading facility at Hopetoun and instead looking to cart sands & earths in Rotainers (rotatable containers with removable lid) from pit to processing or port, which will certainly compliment the Ouyen Intermodal operations.

Iluka Resources, in its letter of support for the Ouyen Intermodal, have advised: *'the facility would certainly be an important consideration in its assessment of the economic viability of developing its deposits in north west Victoria'*

This investment will bring much needed jobs and economic benefit to North West Victoria and beyond.

< General location of Ouyen Intermodal showing close proximity to mineral sand & rare earth strands in the region

Actual location of Ouyen Intermodal in relation to the Nunga West and Boulka mineral sand strands (map including Ouyen Intermodal site; compliments of Iluka Resources)
